THE NEW Supergrill:800

the high performance grill

THE NEW Super

The Supergrill:800 is a quality built steak grill using the best long lasting construction materials - Stainless Steel, Enamel and Cast Iron.

It can be used on full heat or with any combination of either left or right burners, it lights left to right, low or high flame.

The Supergrill:800 offers the highest levels of energy efficiency and the lowest levels of operating costs.

The twin flues maximize the removal of products of combustion minimising the build up of grease and the risk of grill fires.

the high performance energy saving

PERFORMANCE

The four energy saving, patented burners with a total of 22,000 BTU/ 6.5 Kilowatts are angled to give a greater heat pattern over the brander plate.

The brander is capable of holding 15 slices of toast, all will be perfectly produced with an even golden brown across all slices.

The Supergrill:800 cannot be surpassed for consistency and out performs all other gas grills.

QUALITY OF BUILD

Manufactured to the highest European and UK specifications.

The rugged, heavy-duty Supergrill:800 may be wall, stand or shelf mounted.

It has been designed to retro fit onto the stands of most of the existing grills manufactured. The gas supply may be bottom or rear entry for flexibility and ease of fitting. Even the branding plate is constructed using heavy-duty materials, further evidence that the Supergrill:800 is built to last.

EASY TO USE -

EASY TO CLEAN

Designed for easy cleaning the Supergrill:800 has been superbly built with the operator in mind. Not only is it the top performer on the market but the control features are functional, clear and simple to use. There's no mistake with the Supergrill:800.

There's also a flexible gas connector available as an accessory - a must in today's hygiene conscious kitchen.
